📄 SUMMARY

Software Engineer with professional experience designing and developing backend systems, RESTful APIs, mobile applications, and cloud-based solutions. Currently contributing to software development projects at AIBOS Uganda. Experienced working with modern technologies in collaborative environments, with a strong foundation in secure software development, DevOps practices, and enterprise IT operations gained throughout my tenure in the development space. Passionate about building scalable, secure, and impactful digital solutions while continuously expanding expertise in artificial intelligence and cloud infrastructure.

👛 EXPERIENCE

AIBOS Uganda

Software Engineer

12/2025 – Present | Arie Towers, Kampala Uganda

Collaborated with cross-functional teams on the design and development of mobile and web applications, contributing to full-stack software solutions throughout the development lifecycle. Participated in the development of AI-powered platforms by integrating multiple AI models within a scalable application architecture. Gained valuable experience working in agile, collaborative environments while strengthening technical expertise through mentorship and teamwork across diverse software engineering projects.

Equity Bank Limited

Undergraduate Trainee

06/2025 – 12/2025 | Kampala, Central Region, Uganda

Completed hands-on training in software development and IT support. Developed and deployed backend services using modern backend development frameworks, containerization technologies, and version control systems.. Supported staff with system troubleshooting, hardware repairs, and secure workstation setup. Gained practical experience in enterprise IT operations, DevOps, and secure coding practices within a dynamic banking environment.

Equity Bank Limited

Intern

05/2023 – 08/2023

Ntungamo, Western Region, Uganda

Gained practical experience in banking operations through the Equity Leaders Program, supporting customer service, financial technology solutions, and administrative processes. Contributed to efficient service delivery while developing strong communication, problem-solving, and professional workplace skills.

🎓 EDUCATION

Bachelor of Science in Computer Science

Makerere University

08/2023 – 01/2027

UACE and UCE

Kabale Trinity College

02/2016 – 11/2022

TOP SKILLS

Web Development

Experience in designing, developing, and deploying backend services and APIs while developing intuitive frontends for them.

Artificial Intelligence Integration

Experienced in contributing to AI-powered applications and using AI to achieve efficiency and test different workflows

Cloud & DevOps Practices

Proficient in deployment, containerization, cloud platforms, CI/CD concepts, and infrastructure workflows.
